

SUMMARY

**THE MONETARY ASPECT OF THE REPLACEMENT
OF OTTOMAN BY AUSTRO-HUNGARIAN RULE IN
BOSNIA AND HERZEGOVINA**

Based on research into sources and into socio-political and economic conditions in Bosnia and Herzegovina (and partly in the Ottoman Empire), the author gives a monetary picture of the time of Bosnian-Herzegovinian transition to Austro-Hungarian rule, as well as of the era that preceded it. In the turbulent circumstances of the change of two empires, the focus is on the devalued Turkish paper money.
