

## CONTENTS

## OPENING SESSION

- E. FISCHBACH, D. TADIĆ: Parity violation and nuclear forces . . . . . 1

## SECTION 1 — Particle physics

- 1.1. M. MARTINIS: High-energy scattering of an electron off a bound electron . . . . . 5  
 1.2. N. ZOVKO: Electromagnetic form factors of pions and nucleons . . . . . 5  
 1.3. D. N. TOVES, D. H. DAVIS, J. SIMONOVIC, G. BOHM, J. KLAUBUHN, F. WYSOTZKY, M. CSEJTHEY-BARTH, J. H. WICKENS, T. CANTELL, C. NI GHOGAIN, A. MONTWILL, K. GARBOWSKA-PNIEWSKA, T. PNIEWSKI, J. ZAKRZEWSKI: Some properties of the charged  $\Sigma$  hyperons . . . . . 6  
 1.4. O. ADAMOVIĆ, M. JURIĆ, W. SIDIQI: Fragmentation of light nuclei in nuclear emulsion induced by 1.5 GeV/c  $K^-$  mesons . . . . . 6  
 1.5. Ž. TODOROVIC, M. JURIĆ: Production of fast nuclei of  $A = 3$  together with hypernuclei induced by 1.5 GeV/c  $K^-$  mesons on heavy nuclei . . . . . 7  
 1.6. S. POPOV, M. JURIĆ:  ${}^3\text{He}$  nuclei amongst hammer fragments in the interaction of  $K^-$  mesons with emulsion nuclei . . . . . 7  
 1.7. B. DRAGOVIĆ: Final state interaction in the mesonic decay of hypernucleus  ${}^A\text{He}^s$  . . . . . 10  
 1.8. M. JURIĆ: Meson hyperfragments of  $A > 5$  produced by the interaction of  $K^-$  mesons at rest in nuclear emulsions . . . . . 10

## SECTION 2 — Methods of Nuclear Physics

- 2.1. S. KOICKI, A. KOICKI: Application of the perturbed angular correlation method to the study of the magnetism . . . . . 11  
 2.2. M. VAKSELJ, P. KUMP, P. RUPNIK: Some problems of lifetime measurements with doppler shift attenuation method . . . . . 11  
 2.3. M. VAKSELJ, P. KUMP, P. RUPNIK: The measurement of penetration profiles of argon ions in tantalum using (p, gamma) reaction . . . . . 11  
 2.4. V. STANCIĆ: The unitary operator method in theory of slow neutron scattering by bound centers system . . . . . 11  
 2.5. V. KOS, K. ILAKOVAC, A. LJUBIĆIĆ, B. HRASTNIK: Gamma-ray planar Si(Li) polarimeter . . . . . 13  
 2.6. B. MOLAK, K. ILAKOVAC, J. NOSIL: Polarimetric efficiency of a planar Ge(Li) detector . . . . . 15  
 2.7. K. ILAKOVAC, M. JURČEVIĆ, B. MOLAK: Tests and calibration of a 3D system . . . . . 15  
 2.8. I. SLAVIĆ: Automatic analysis of the gamma radiation spectra . . . . . 17  
 2.9. V. HENČ-BARTOLIĆ: The short dead time of halogen parallel plate counters . . . . . 17  
 2.10. K. PRELEC, M. ISAILA, M. G. WHITE: Acceleration of nitrogen and neon ions to energies above 200 MeV/nucleon . . . . . 18  
 2.11. S. KOICKI, A. KOICKI, V. AJDACIĆ: Study of the phosphorescent component of NaI(Tl) and possibility of its application . . . . . 19  
 2.12. J. PAHOR, A. MOLJK, A. KODRE, T. RUPNIK, M. HRIBAR: The K-shell fluorescence yields of argon, chlorine and sulphur . . . . . 19  
 2.13. D. HANZEL, M. MALI, A. MOLJK: Study of internal fields in  $\text{BiFeO}_3$  by Mössbauer spectroscopy . . . . . 22  
 2.14. T. LECHPAMMER, B. BABAROVIC: An internal rotating target for the cyclotron . . . . . 23

## SECTION 3 — Nuclear structure

3.1.	M. V. MIHAILOVIC, M. ROSINA: Solving the many-body problem with linear programming . . . . .	25
3.2.	G. ALAGA, F. KRMPOTIĆ, V. LOPAC, V. PAAR, L. ŠIPS: Quadrupole moments of the even-even vibrational nuclei . . . . .	25
3.3.	R. A. BROGLIA, B. NILSSON, S. LANDOWNE, V. PAAR, D. R. BÈS, E. FLYNN, G. IGO, P. D. BARNES: Application of the "bootstrap" on the states and processes around the doubly closed shell nuclei. The Pb case. . . . .	29
3.4.	J. HENDEKOVIC: On the BCS and HFB methods in terms of reduced density matrices . . . . .	30
3.5.	M. KREGAR, G. G. SEAMAN: Investigation of the low energy spectrum in $^{93}\text{Nb}$ . . . . .	32
3.6.	N. MANKOC-BORŠTNIK, M. V. MIHAILOVIC: Projection of angular momentum from the generator coordinate wave function . . . . .	32
3.7.	D. JUSTIN, M. V. MIHAILOVIC, M. ROSINA: Pairing vibrational states in Pb and Sn isotopes . . . . .	32
3.8.	M. ROSINA, M. V. MIHAILOVIC: A formula to calculate particle-hole excited states if the two-body density matrix of the ground state is known . . . . .	32
3.9.	G. ALAGA, V. PAAR: Three-particle states in the semi-microscopic model . . . . .	32
3.10.	G. DUSSEL, R. LIOTTA, R. A. BROGLIA, V. PAAR: Hrpa effects in even-even nuclei (Microscopic and phenomenological approach) . . . . .	33

## SECTION 4 — Simple particle systems

4.1.	B. ANTOLKOVIC: Study of three particle reactions on light nuclei induced by 14.4 MeV neutrons . . . . .	35
4.2.	D. RENDIĆ, V. VALKOVIC, N. D. GABITZSCH, W. von WITSCH, G. C. PHILLIPS: Four-body break-up $d + {}^{11}\text{B} \rightarrow 3\alpha + n$ and states in ${}^9\text{Be}$ . . . . .	35
4.3.	J. HUDOMALJ, V. VALKOVIC, P. TOMAŠ: Three-body break-up in the reaction $d + {}^7\text{Li} \rightarrow \alpha + \alpha + n$ . . . . .	36
4.4.	Z. BAJZER, G. PAIĆ: The effect of the quasifree scattering process on the shape of kinematically incomplete spectra at forward angles in the deuteron breakup . . . . .	36
4.5.	Z. DOLENEC, B. ANTOLKOVIC: Study of the ${}^{12}\text{C}(n, n)3\alpha$ reaction in a kinematically complete experiment . . . . .	37
4.6.	N. BIJEDIĆ: The three-nucleon bound state wave function from elastic electron scattering . . . . .	39
4.7.	R. POPIĆ, B. STEPANCIĆ, M. STANOJEVIĆ: Preliminary report about the work on ${}^6\text{He} + {}^1\text{H}$ . . . . .	40
4.8.	D. ĆIRIĆ, B. STEPANCIĆ, M. ALEKSIĆ, R. POPIĆ, D. STANOJEVIĆ and K. SUBOTIĆ: ${}^6\text{Li}(t, p){}^6\text{Li}$ reaction at low energies . . . . .	40
4.9.	H. OBERHUMMER, H. ZINGL: Some problems with separable potentials . . . . .	41
4.10.	L. PITTNER, P. URBAN: Analysis of the off mass shell-behaviour of the hadronic scattering matrix as constructed by means of an effective Lagrangian model . . . . .	42

## SECTION 5 — Nuclear Spectroscopy

5.1.	G. KERNEL: Isotopic spin in photonuclear reactions . . . . .	45
5.2.	D. BRAJNIK, D. JAMNIK, G. KERNEL, V. MIKLAVŽIĆ, A. STANOVIĆ: Photo-nuclear reaction cross sections for different decay channels on ${}^{90}\text{Zr}$ . . . . .	45

5.3.	B. EMAN, D. TADIC: Parity nonconservation in heavy nuclei and the structure of weak-interaction hamiltonians . . . . .	45
5.4.	A. H. KUKOČ, R. B. VUKANOVIĆ, I. V. ANIČIN: The complete interpretation of data from gamma-skip-gamma directional correlation measurements — $^{124}\text{Te}$ . . . . .	46
5.5.	J. SIMIĆ, S. KOIČKI, B. LALOVIĆ: Time coincidences in the reactions $\text{Er}(n, \gamma)$ and $\text{Lu}(n, \gamma)$ . . . . .	46
5.6.	B. MOLAK, J. NOSIL, K. ILAKOVAC: Linear polarization of 662 and 279 keV gamma rays elastically scattered in uranium . . . . .	46
5.7.	K. PISK, K. ILAKOVAC: Internal and external double-electron ejection . . . . .	48
5.8.	Đ. M. KURBANI, M. STANOJEVIĆ, M. BOGDANOVIĆ: Measurement of the gamma transition intensities in $^{185}\text{Re}$ . . . . .	49
5.9.	K. ILAKOVAC, B. MOLAK, M. JURČEVIĆ: Search for the $\gamma\gamma$ decay of the 392-keV state in $^{113}\text{In}$ . . . . .	49
5.10.	N. BILIĆ, M. MARTINIŠ, K. PISK: Z-dependence of linear polarization in Rayleigh scattering . . . . .	49
5.11.	M. ŽUPANČIĆ, I. BIKIĆ, L. MARINKOVIĆ: The EO component in the $2^+ - 2^+$ transition of 879 keV in the $^{160}\text{Dy}$ . . . . .	50

#### SECTION 6 — Nuclear reactions and capture processes

6.1.	F. CVELBAR, M. BUDNAR, M. POTOKAR: Prompt $\gamma$ -ray spectra and integrated cross sections for the radiative capture of 14 MeV neutrons . . . . .	53
6.2.	M. POTOKAR, F. CVELBAR, M. BUDNAR: The radiative capture of 14 MeV neutrons in heavy nuclei . . . . .	55
6.3.	D. M. STANOJEVIĆ, K. M. SUBOTIĆ, B. Z. STEPANČIĆ, R. V. POPIĆ, M. R. ALEKSIĆ: $^9\text{Be}(^3\text{He}, p)^{11}\text{B}$ reaction at low $^3\text{He}$ energy . . . . .	56
6.4.	K. SUBOTIĆ, M. ALEKSIĆ, R. POPIĆ, D. STANOJEVIĆ, B. STEPANČIĆ: $^9\text{Be}(^3\text{He}, n)^{11}\text{C}$ reaction between 600 and 1100 keV . . . . .	58
6.5.	R. ANTANASIJEVIĆ, M. JURIĆ, V. GERC: A check of the existence of the ternary fission of $^{235}\text{U}$ induced by thermal neutrons . . . . .	59
6.6.	R. ČAPLAR, E. HOLUB, P. KULIŠIĆ, Đ. VESELIĆ, N. CINDRO, J. VULETIN: Activation measurements of fast neutron radiative capture . . . . .	59
6.7.	S. LULIĆ, M. DIKSIĆ: Isomeric cross section ratios for (n,p) reactions induced by 14.6 MeV neutrons in Te isotopes . . . . .	61
6.8.	E. COFFOU: The distortion of the deuteron by the Coulomb field . . . . .	62
