Page

Part I Superconductors

- 17 I. Sega: Electronic Molecules of High- T_c Superconductors (Invited paper)
- 23 E. Babić, M. Prester, Z. Marohnić, D. Drobac and J. Horvat: Magnetic and electrical measurement of critical currents in sintered $YBa_2Cu_3O_{7-x}$
- 27 M. Ilić, M. Petravić, J.R. Cooper, B. Leontić, O. Milat and G. Bratina: Synthesis, oxygen treatment and ac susceptibility studies of $YBaCuO$ single crystals
- 32 A. Szytuła, G. Mavrodiev, S. Koneska and M. Fukarova-Jurukovska: Comparison of dilatometric measurements of $YBa_2Cu_3O_{7-x}$ in oxygen, air and argon atmosphere

Part II Ionic Crystals, Ferroelectrics, Dielectrics, Ionic Conductors, Optical Properties of Condensed System, Liquid Crystals

- 39 Z. Vučić: Structural properties of superionic conductors (Invited paper)
- 52 B. Zekš: Ferroelectric crystals, ferroelectric incommensurate systems and ferroelectric liquid crystals (Invited paper)
- 61 M.I. Marković: Thermal neutron scattering on hydrogen atom nucleus of polyethylene
- 65 B. Cvikl, U. Dahlborg, J. Peternej, I. Jenčić and M. Davidović: Uniaxial restricted molecular reorientation in liquid crystals
- 71 A. Andonovski and O. Zajkov: Electro-optical examination of the birefringence on nematic liquid crystal type INC-1285

- 76 M.Lj. Napijalo, M.M. Napijalo, J. Dojčilović and L. Novaković: Structure and physical properties of mixed phosphates of cobalt and nickel with cadmium
- 80 N. Tjapkin and G. Pépy: Disorder in $(\text{ND}_4)_3\text{ZnCl}_5$ at low temperatures
- 84 A. Smontara, K. Biljaković, T. Futivić, T. Idžotić: Thermal conductivity of the one-dimensional chain conductor
- 88 L. Novaković, J. Dojčilović, M.M. Napijalo and M.Lj. Napijalo: Physical properties of mixed pyrophosphates of cobalt and nickel with barium
- 92 M. Petravić, L. Forro and J.R. Cooper: Resistivity and threshold electric field measurements under pressure for the inorganic chain conductor $(\text{NbSe}_4)_{10/3}\text{I}$
- 97 R. Gajić: Determination of optical constants of solid state specimens by dispersive Fourier transform spectroscopy
- 101 D.M. Todorović and P.M. Nikolić: Investigation of optical interference by a photoacoustic method
- 105 M. Napijalo, L. Novaković, J. Dojčilović and M.Lj. Napijalo: Optical, magnetic and dielectric properties of Co(II) and arsenate with viviente structure
- 109 Lj. Aljinović, V. Gotovac and M. Smith: Photoelectrochemical cell with cuprous oxide electrode
- 113 A. Andanovski, S. Bahcevandžiev, D. Gersanovski and B. Veljanovski: Study of degradation processes of silver mirrors by method of light scattering
- 119 J. Dojčilović, L. Novaković, M.M. Napijalo and M.Lj. Napijalo: Physical properties of mixed phosphates of cobalt and nickel with thorium
- 123 A. Smontara, K. Biljaković and L. Ferro: Thermoelectric power of the transition-metal tetrachalcogenides: $(\text{MX}_4)_n\text{I}$
- 127 M. Srečković, M. Drifford and J.P. Dalbez: Technical and applicative aspect of the quasielastic scattering of Ar^+ ion laser light

- 131 J. Gladić and O. Milat: Orientation variants in the ordered phase of stoichiometric cuprous selenide
- 135 B. Cvikl, L.Y. Schreiner, M.M. Pintar, J. Peternej and A. Heidemann: Inelastic neutron scattering study of NH_4 ground state tunneling splitting in solid NH_4SnCl_3
- 139 M. Ivanda, M. Segedin and B. Pivac: Some examples of applications of laser micro Raman spectroscopy

Part III Magnetism and Metals

- 147 A. Szytula: Magnetic structures of rare earth compounds (Invited paper)
- 159 V. Urumov: Ising model of regularly distributed $S=1$ and $S=3/2$ spins on a honeycomb lattice
- 163 S. Stoimenov and Z. Stojanov: Influence of porosity on ultrasound and elastic moduli in sintered nickel
- 167 A.M. Tonejc and A. Tonejc: Appearance of massive and martensitic phases in CuGa alloys rapidly quenched from the melt
- 171 P.M. Nikolić, S. Djurić, O.S. Aleksić, V. Blagojević, M. Pavlović, J. Pavlović and J. Suvajić: Structural, dielectric and magnetic properties of manganese-zinc ferrites
- 175 D. Rodić, P.J. Ahlzen, Y. Andersson and R. Tellgren: Neutron diffraction study of antiferromagnetic $\text{Pd}_3\text{MnD}_{0.5}$

Part IV Disorder Systems (Amorphous, Spin Glasses and Liquids)

- 181 E. Babić: Amorphous metals: Physics and application (Invited paper)
- 194 B. Boršnik: Modelling of liquid-vapour interface. Study of surface tension and hydrostatic equilibrium
- 198 E. Girt, G. Knežević, R. Baltić, Er. Girt and K. Novalija: Normalising the values of isothermal dilatometric measurements of amorphous metallic samples

- 202 G. Ivanovski, V. Petruševski and B. Soptrajanov: A model for the non-bending vibration in some crystallohydrates
- 206 I. Kokanović, B. Leontić and J. Lukatela: Magnetic susceptibility of hydrogen doped 4d-3d metallic glasses
- 211 S.R. Lukić, A.F. Petrović and D.M. Petrović: Thermal stability and photo-recording in amorphous $\text{Cu}_x(\text{As}_2\text{Se}_3)_{1-x}$ system
- 216 R. Ristić, E. Babić and K. Saub: Temperature and concentration dependence of the electrical resistivity of ZrCu and ZrNi glassy alloys
- 220 M. Očko: Thermopower of $\text{Ni}_{81.5}\text{B}_{18.5-y}\text{P}_y$ amorphous alloys
- 224 P.M. Nikolić, S.S. Vujatović, M. Pavlović and D. Korolija: Parallel optical properties of single crystal and amorphous $\text{GeS}_{2-x}\text{Se}_x$ alloys
- 228 J. Ivkov and E. Babić: The Hall effect and the electrical resistivity in amorphous NiBSi alloys
- 232 J. Horvat, Z. Marohnić and K. Zadro: Dynamic magnetic hysteresis of amorphous ferromagnets
- 236 Z. Samardžija, P. Tomić and A. Kuršumović: An investigation of quenching effects on structural relaxation of a metallic glass
- 240 M.I. Avramov, D.M. Petrović, O.V. Kiminec and V.V. Kiminec: Photoluminescence and absorption edge of the amorphous semiconducting system $\text{Ge}_{20}\text{As}_{14}(\text{S}_x\text{Se}_{1-x})_{52}\text{I}_{14}$

Part V Semiconductors

- 245 U.V. Desnica and R. Bošković: Defects in semi-insulating gallium arsenide (Invited paper)
- 260 D. Tjapkin, M. Avramov, T. Tošić and M. Jevtić: On some problems in the screening length determination in heavily doped semiconductors
- 264 R. Ramović, A. Guljaš, D. Indjin and Z. Ristovski: The two-dimensional analysis of the distribution of charged carriers in an Al-GaAs n^+-n-n^- heterogeneous structure under the influence of the external electric field

- 268 M. Stojić, B. Babić-Stojić and B. Stošić: Electron paramagnetic resonance studies of $\text{Hg}_{1-x}\text{Mn}_x\text{Se}$
- 274 Z. Ristovski, D. Stojanović, D. Indjin, R. Ramović, D. Stojanović: Calculating current density in two-dimensional semiconductor pin structures
- 278 O. Žižić, U. Mioč, Z. Popović and M. Srećković: The effect of manganese on the energy gap of the semiconducting alloy $\text{Hg}_{1-x}\text{Mn}_x\text{Se}$
- 283 Z. Popović, O. Žižić, U. Mioč and G. Čogurić: Optical characteristics $\text{Hg}_{1-x}\text{Mn}_x\text{Se}$
- 287 V. Milanović, Z. Ikonić and D. Tjapkin: New selection rule for interband light absorption in semiconductor inverse superatom
- 291 G. Nikolić: Defects investigation in photo-CVD silicon nitride films
- 295 O. Milat, J. Gladić and Z. Vučić: Electron diffraction study of cuprous selenide single crystal structure
- 299 Z. Djurić and Z. Jakšić: The surface recombination and influence on quantum efficiency of photovoltaic devices
- 303 A. Bonefačić, A. Tonejc and Z. Ogorelec: Solid solution of gallium in antimony produced by rapid quenching
- 307 B. Babić-Stojić and M. Stojić: Influence of temperature and defects induced by gamma rays on the transport properties of $\text{Hg}_{1-x}\text{Mn}_x\text{Se}$
- 312 M. Fukarova-Jurukovska and M. Ristov: Slow response photoconductivity of $\text{Cd}_{1-x}\text{Hg}_x\text{S}$ thin films
- 316 Z. Ikonić and V. Milanović: Electrical quadrupole transitions in semiconductor quantum wells—breakdown of selection rules
- 320 I. Grozdanov, M. Ristov, Gj. Sinadinovski and M. Mitreski: Effects of annealing on the composition and properties of SnS thin films
- 324 J. Matović and Z. Djurić: Nonlinearity of the piezoresistivity effect of p-type silicon diffused layers with high surface concentration

- 328 H. Simić, S. Marić and M. Stojić: The influence of radiation on the lattice defects in p-type GaAs

Part VI Excitations

- 335 M. Škrinjar, D. Kapor and S. Stojanović: Application of coherent states in the theory of magnetic solutions (Invited paper)
- 346 D.Lj. Mirjanić: Structures with broken translational symmetry (Invited paper)
- 358 G. Maksimović and F.R. Vukajlović: Influence of the nonadiabatic terms on the energy of the excitonic molecules.
- 363 Lj.D. Mašković and B.S. Tošić: Solutions and band zone splitting
- 367 M. Satarić, Dj. Koruga, Z. Ivić and R. Zakula: On the disintegration of dimers at the tubulins by deformability localized states
- 372 S. Kilić, T. Perski and S. Sunarić: A lower energy bound for n-particles quantum systems.
- 376 N. Milinski: The DC electric conductivity calculation by the series for the memory function

Part VII Miscellaneous

- 381 J. Stepišnik: Applications of new NMR techniques (Invited paper)
- 392 T.M. Nenadović: Bema-induced modification of crystalline solids
- 411 P. Tomić, Z. Milanović and A. Kuršumović: An investigation of the nozzle geometry and gas velocity influence on aluminium powder size distribution
- 415 T. Terzić, Z. Rakočević and M.M. Tošić: Potassium auger electron emission by k^+ ion bombardment of metal surfaces
419. N. Cvjetičanin, S. Mentus and N. Petranović: The impedance measurements of metal-silicate systems

- 423 M.M. Tošić, R. Gligorijević, I. Terzić and Z. Rakočević: A study of plasma nitrided layer thickness time relationship
- 431 Author Index
- 434 Subject Index
