

## EDITORIAL

Dear Friends and Colleagues,

Readers are presented with a new issue of the international scientific journal *Inter EU Law East*, published at the close of the year and offering a diverse overview of contemporary scientific research and analysis in the fields of law and economics. Remaining faithful to its mission, the Journal continues to foster dialogue between legal and economic disciplines within the broader context of European integration, globalization, and increasingly complex regulatory and market environments.

This issue is marked by a strong and diverse contribution from the international scientific and professional community. The twelve selected papers reflect both the breadth and depth of current interdisciplinary research, addressing pressing legal and economic challenges from multiple perspectives and jurisdictions. The contributions cover a wide range of topics, including the legal regulation of public procurement in the European Union, developments in EU family law, the protection of traditional family values, and emerging issues related to artificial intelligence and the sui generis protection of AI-generated outputs.

The interdisciplinarity of the topics, the international composition of author teams, and the topical relevance of the research once again confirm the Journal's role as a platform for critical analysis and scholarly exchange. The published papers combine theoretical insight with practical relevance, offering valuable contributions to both academic discourse and real-world regulatory and business practices.

We extend our sincere gratitude to all authors, reviewers, and collaborators whose expertise and dedication have made this issue possible. We invite our readers to engage with the published works as a source of inspiration for further research, reflection, and contribution to the continued development of legal and economic science.

Wishing you all pleasant holidays!

Warm regards,

Prof. Hana Horak, PhD
