Size: 246x189

Number of pages: 432

Number of illustrations: 98

Price: £27.99

ISBN-13: 978-0-415-48091-8

The Archaeology of Human Bones introduces students to:

- anatomy of bones and teeth, utilising a large number of images,
- it analyzes the biasing effects of decay and incomplete recovery on burial data from archaeological sites, and discusses what we may learn about burial rites from human remains,
- demographic analysis of earlier populations,
- normal skeletal variation,

- disease and injury, isotopic and DNA analysis of bone,
- the study of cremated bone and ethical aspects of working with ancient human remains,
- current scientific methods are explained, alongside a critical discussion of their strengths and weaknesses.

Featuring case studies from around the world and with copious illustrations, *The Archaeology of Human Bones* continues to be a crucial work for students of archaeology.
