CONTENTS

217 Editorial

219 A Word from the Dean of FESB

Božo Terzić, Goran Majić, Alojz Slutej — **221** Stability Analysis of Three-Phase PWM Converter with LCL Filter by Means of Nonlinear Model
original scientific paper

Antonio Šarolić, Petar Matić — **233** Wireless LAN Electromagnetic Field Prediction for Indoor Environment Using Artificial Neural Network
original scientific paper

Matko Šarić, Hrvoje Dujmić, Nikola Rožić — **241** Including of Continuous Model for Discriminating Chromatic and Achromatic Pixels in Cylindrical Distance
original scientific paper

Petar Šolić, Joško Radić, Nikola Rožić — **255** Algorithm for Deriving Optimal Frame Size in Passive RFID UHF Class1-Gen2 Standard using Combinatorial Model Boundaries
original scientific paper

Josip Musić, Mojmil Cecić, Vlasta Zanchi — **264** Real-Time Body Orientation Estimation Based on Two-Layer Stochastic Filter Architecture
preliminary communication

Goran Kraljević, Sven Gotovac — **275** Modeling Data Mining Applications for Prediction of Prepaid Churn in Telecommunication Services
professional paper

Hrvoje Domitrović, Kristian Jambrošić, Marko Horvat

284 Evaluation of Nonlinear Digital Audio Systems through Transparency Reduction Using the Combined Test Signal
original scientific paper

Nada A. Fayza

293 Performance Analysis of Multiserver ATM Buffers Routing Multimedia Traffics with Geometric Service Time
original scientific paper

302 Ant Country – second part: Epilogue

304 Meetings and Events
