Dear readers,

The issue you are reading is the result of united work of the Ekscentar team and the organizers of the International Geodetic Students Meeting (IGSM) which was held in May, 2010. on our faculty. The idea about the issue fully devoted to the IGSM was born during the organization of the meeting and it was meant to be a student-professional anthology of the events from the meeting. The issue is written in English and it covers many themes and events.

The International Geodetic Students Meeting IGSM 2010. became part of a rich Croatian geodetic heritage. Organizers of the event showed that a dedicated and patient work brings extreme achievements that future generations should be proud of. Faculty education gives many possibilities and we should make the most of those years. Think for a while and then go; maybe you are the leader of a new section or a project.

Best wishes!

Matej Varga

Special thanks to the Faculty of Geodesy at University of Zagreb, for financial help that made publishing of this issue possible.

Editorial would like to thank **Hrvoje Mahović** for great help in creating this issue.

Photos for the front page were made by **Ivan Tomljenović**

Last page was designed by **Damir Kontrec**.
