

**Role of iconographical sources in the  
macroseismic reevaluation of destructive  
seismic events in Italy\***

*Graziano Ferrari*

*Societa di Geofisica Applicata, Bologna, Italy*

The role of iconographical sources such as drawings, paintings and photographs to better define the descriptive pictures of historical earthquakes is under consideration. Some significant examples are introduced here, wherein maximum intensity of some destructive events observed in the most affected localities could be re-estimated through drawings, paintings or photographs.
