ASEC 2015

In spring of this year, from the 13th to the 15th of May, 2015, SPE Student Chapter Croatia was host to the second edition of the Annual Student Energy Conference. By organizing this event, our main goal is to bring together students, young professionals and experts from different parts of the world to discuss the latest achievements and ideas related to the Oil and Gas Industry. Our second goal is developing international relations between SPE Student Chapters and Colleagues worldwide, as well as entertainment activities which further enhance friendship among Chapters.

Along with the official part of the Conference, promoting the Croatian industry and natural beauty is among the top priorities of our programme. Our participants had an opportunity to visit the INA Oil Refinery located near Rijeka, Mine Zrinski, Plitvice Lakes and other auxiliary locations.

ASEC 2016

From the 9th to the 11th of March, 2016, SPE Croatian Student Section is proud to host another (3rd) edition of the Annual Student Energy Conference (ASEC 2016). The organization of this great event has already started and we are working on bringing even more students from all around the world. For this year, we are introducing some novelties in order to improve negotiation and debating skills among students and professionals (i.e. workshops and open debates). University experts from four different countries have already confirmed their attendance and will present their latest projects. We will again merge both educational and entertaining activities which will surely, benefit both academic and professional participants.

Student Projects

With the initiative of the current Board, Chapter started to develop strong links between students and industry, as well as with scientific research. Even though only one month has passed, interest among students has risen greatly. Even more, one project has already been approved by the Faculty Board and is proceeding while others are in the development phase. Due to the increase in Chapter's activities, the number of members has doubled in less than one month.

Chapter's Board is constantly promoting the Faculty at an international level by visiting conferences and workshops abroad. The latest events we attended were the ATCE 2014 in Amsterdam, East Meets West 2015 in Krakow and the University of Leoben Anniversary this year. Further, Chapter's Representatives will participate in the Regional SPE meeting in Istanbul, Turkey in October and in the International Petroleum Technical Conference (IPTC 2015) to be held in December this year in Doha, Qatar.

However, Chapter is constantly seeking new Members who will be given an opportunity to bring Chapter to a higher level by sharing their ideas and suggestions. Valuable experience is guaranteed.

Hrvatski studentski ogranak SPE-a

Prikaz rada Udruge

ASEC 2015

U proljeće ove godine, od 13. do 15. svibnja 2015. godine, hrvatski studentski ogranak SPE-a bio je domaćin druge po redu međunarodne studentske energetske konferencije (ASEC 2015). Primarni je cilj ove konferencije okupljanje studenata, mladih inženjera i stručnjaka iz svih dijelova svijeta kako bi raspravljali o najnovijim dostignućima i idejama u području naftne i plinske industrije. Nadalje, razvijanje prijateljskih odnosa s međunarodnim studentskim ograncima i kolegama također spada u ciljeve programa konferencije.

Osim službenoga dijela konferencije nastojimo promovirati hrvatsku industriju i prirodne ljepote organizirajući stručne i turističke posjete, kao što su posjet rafineriji Rijeka, rudniku Zrinski, Plitvičkim jezerima i slično.

ASEC 2016

I ove akademske godine hrvatska sekcija SPE-a s ponosom najavljuje treće izdanje međunarodne studentske energetske konferencije koja će se održati od 9. do 11. ožujka 2016. Sekcija je već započela s organizacijom konferencije te se nadamo još većemu odazivu nego prijašnjih godina. Ovogodišnja konferencija obogaćena je dodatnim sadržajima kojima je cilj poboljšati komunikacijske vještine svih sudionika (radionice i debate). Događaj će uveličati stručnjaci sa stranih sveučilišta koji su već potvrdili dolazak kako bi predstavili svoje najnovije projekte. Povezivanjem obrazovnih i zabavnih događanja cilj nam je osigurati raznolik sadržaj za široki profil sudionika konferencije.

Studentski projekti

Uz inicijativu sadašnjega vodstva udruge ogranak je započeo s povezivanjem studenata i industrije preko znanstvenih istraživanja i projekata, što je pobudilo znatan interes među studentskom populacijom. Štoviše, vodstvo fakulteta već je odobrilo jedan projekt koji je trenutačno u fazi realizacije, dok su ostali projekti u fazi razvoja. Zbog navedenih aktivnosti udruge broj članova udvostručio se u nepunih mjesec dana.

Članovi vodstva udruge nastoje promovirati rad Fakulteta i udruge posjećujući događaje diljem svijeta u organizaciji međunarodnoga SPE-a. To su redom: ATCE 2014. u Amsterdamu, East Meets West 2015. u Krakovu, 175. obljetnica djelovanja Sveučilištu u Leobenu, regionalni SPE-ov sastanak u Istanbulu, IPTC 2015. u Dohi itd.

Pozivamo sve zainteresirane studente da svojim djelovanjem u udruzi, idejama i prijedlozima pridonese radu i razvoju udruge i time steknu korisna iskustva.
