

PROSTOR

Scholarly journal of Architecture and Urban planning

Aims and scope

Aims

The journal PROSTOR (ISSN 1330-0652) is an international, peer-reviewed, open access journal (free for readers) that publishes an original scientific paper, preliminary communication, and scientific subject review. Editors can also allow the publishing of non-review papers such as conference and book reviews and reviews of doctoral dissertations. Papers are published primarily in English. We encourage researchers to publish their innovative ideas and results in as much detail as possible, but the papers' length should not exceed 28800 characters with spaces.

PROSTOR aims to serve as a communication medium for all concerned with scientific, technical, and spatial problems ((global topics, or local topics compared with the European case studies, or connected with the European context) dealing dominantly with architecture and urbanism as well as cultural studies, environmental studies, human geography and urban studies.

Scope

PROSTOR covers the following scope of research:

- architecture
- architectural/building engineering
- urban planning
- design
- art history
- the philosophy, art, and science of architecture designing
- green buildings
- energy and buildings
- building physics
- building materials
- building construction
- building structures
- construction management
- building/facility management
- the linkages and interactions between the architecture/urban planning and archaeology, ethnology, anthropology, sociology, geography, geodesy, and forestry
- the linkages and interactions between the built environment and ecology, natural resources, climate, local communities, public policy, and economic development.
