

**Libellarium: journal for research in the field of information and related sciences** has been published jointly by the Department of Information Sciences of the University of Zadar and the Department of Information Sciences of the Faculty of Humanities and Social Sciences in Osijek. The journal covers a wide range of different topics in the field of information and related sciences – ranging from information science theory and methodology, the history of books, printing, publishing and book trade, the preservation, presentation and protection of written and digital cultural heritage, heritage institutions and their activities, the sociology of books and reading, information literacy and information behaviour, visual communications, knowledge organization, e-learning, bibliometrics, scientometrics and informetrics to digital humanities, contemporary trends in publishing and book trade, technological change and the relationship between humanity and technology, etc.

The Editorial Board accepts papers in Croatian and English, and, in exceptional cases, in other languages as well. All submitted papers undergo a double-blind peer review process. As regards the formatting of the papers, it is necessary to follow the submission guidelines in order to facilitate the preparation of the journal and its timely publication.

This journal provides instant open access to its entire content in line with the belief that the public availability of research findings encourages greater exchange of knowledge and ideas.
