

Ethics and Procedures

General

[Journal Brodgradnja is the member of the Committee on Publishing Ethics \(COPE\) since 2017](#)

The important principles with respect to the authors' paper are that the paper should: be the authors' own original work, which has not been previously published elsewhere reflect the authors' own research and analysis and do so in a truthful and complete manner, properly credit the meaningful contributions of co-authors and co-researchers, not be submitted to more than one journal for consideration (ensuring it is not under redundant simultaneous peer review), and be appropriately placed in the context of prior and existing research.
