

## **Ethics in publishing**

*Croatian Journal of Food Science and Technology* publishes only original material, i.e., material that has neither been published elsewhere, nor is under review elsewhere. If authors have used their own previously published work, or work that is currently under review, as the basis for a submitted manuscript, they are required to cite the previous work and indicate how their submitted manuscript offers novel contributions beyond those of the previous work.

The work described in the article must be in accordance with The Code of Ethics of the World Medical Association (Declaration of Helsinki) for experiments involving humans <http://www.wma.net/en/30publications/10policies/b3/index.html>; EU Directive 2010/63/EU for experiments carried out on animals:

[http://ec.europa.eu/environment/chemicals/lab\\_animals/legislation\\_en.htm](http://ec.europa.eu/environment/chemicals/lab_animals/legislation_en.htm).

## **Editorial board**

Editor in Chief makes the final decision on whether the work will be accepted and published or not. The criterion for selection is the quality and character of the work, regardless of race, gender, ethnicity, religious or political beliefs of the author. The Editorial board cannot disclose any information on submitted papers nor may it be used for other purposes.

## **Authors**

Authorship should be limited to those who have made a significant contribution to the conception, design, execution, or interpretation of the reported study. The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted. Authors are requested to disclose any actual or potential [Conflict of interest](#) including any financial, personal or other relationships with other people or organizations within three years of beginning the submitted work that could inappropriately influence, or be perceived to influence, their work.

## **Reviewers**

Reviewers must disclose to editors any conflicts of interest that could bias their opinions of the manuscript, and they should disqualify themselves from reviewing specific manuscripts if they believe it to be appropriate. Conflict of interest for a given manuscript exists when a participant in the peer review and publication process—author, reviewer, and editor—has ties to activities that could inappropriately influence his / her judgment, regardless of whether judgment is, in fact, affected.

Ethical standards for publication exist to ensure high-quality scientific publications, public trust in scientific findings, and that people receive credit for their ideas.

Financial relationships with industry (for example, employment, consultancies, stock ownership, ...) either directly or through immediate family, are usually considered the most important conflicts of interest. However, conflicts can occur for other reasons, such as personal relationships, academic competition, and intellectual passion.

*Croatian Journal of Food Science and Technology* adheres to the standards of editorial work and ethical rules of procedure for editors, written by Committee on publication ethics (COPE) and published on the web site of [Ministry of science, education and sports of the Republic of Croatia](#).
