

Author Guidelines

Submitted manuscripts ought to:

- be unpublished, either completely or in their essential content, in English or other languages, and not under consideration for publication elsewhere;
- be approved by all co-Authors;
- contain citations and references to avoid plagiarism, self-plagiarism, and illegitimate duplication of texts, figures, etc. Moreover, Authors should obtain permission to use any third party images, figures and the like from the respective copyright holders. The pre-reviewing process includes screening for plagiarism and self-plagiarism by means of internet browsing and software Turnitin;
- add the DOI to each item in the reference list if available (see the DOI display guidelines at Crossref)
- be sent exclusively electronically to the Editors (eujap@ffri.uniri.hr) (or to the Guest editors in the case of a special issue) in a Word compatible format;
- be prepared for blind refereeing: authors' names and their institutional affiliations should not appear on the manuscript. Moreover, "identifiers" in MS Word Properties should be removed. Generally, there are two options for anonymizing references to ones own work: 1) Author X (2020) argues that (...); 2) In my previous work (Masked reference), I have argued (...). EujAP encourages the authors who plan to submit their manuscript to use the former, third person, type of self-citation because it allows the reviewers to check the relevance, adequacy, accuracy, etc. of the references. However, if for some reason the prospective author(s) believe it would behoove them to use the second type of self-citation, they are allowed to do so provided that they offer a short explanation of this decision in the accompanying title page;
- be accompanied by a title page, that is, a separate file containing the title of the manuscript, a short abstract (not exceeding 300 words), keywords, academic affiliation and full address for correspondence including e-mail address, other relevant information (see below), and, if needed, a disclosure of the Authors' potential conflict of interest that might affect the conclusions, interpretation, and evaluation of the relevant work under consideration;
- be in American or British English;
- be no longer than 9000 words, including references (for Original and Review Articles).
- be between 2000 and 5000 words, including footnotes and references (for Discussions and Critical notices)

Policy for submitted manuscripts

If the submitted manuscript is authored by more than one person, there should be a brief explanation in the title page of the contribution of each Author with respect to the conception and design of the argument, study, etc. and writing of the paper.

To preserve the anonymous status of the review process, we prefer that submitted versions of manuscripts are not deposited in open access article repositories.

Policy for accepted and published manuscripts

Accepted and published versions of the manuscript can be deposited in institutional or personal repositories without an embargo period. In case of published manuscripts, a link (with DOI) to the journal's web pages and/or HRCAK should be added.

Malpractice statement

If the manuscript does not satisfy minimal scholarly requirements and it does not match the scope and aims of EujAP, the Editors reserve the right to reject the manuscript without sending it out to external reviewers. Moreover, the Editors reserve the right to reject submissions that do not satisfy any of the previous conditions.

If, due to the authors' failure to inform the Editors, already published material will appear in EujAP, the Editors will report the authors' unethical behaviour in the next issue and remove the publication from EujAP web site and the repository HRCAK.

In any case, the Editors and the publisher will not be held legally responsible should there be any claims for compensation following from copyright infringements by the authors.

For additional comments, please see our Publication ethics. To get a sense of the review process and how the referee report ought to look like, the prospective Authors are directed to see the section For Referees.

Style

Accepted manuscripts should:

- follow the guidelines of the most recent Chicago Manual of Style (or check the latest issues of EujAP)
- contain footnotes and no endnotes
- contain references in accordance with the author-date Chicago style, here illustrated
