

Guidelines for authors

Manuscripts are submitted in Croatian, Italian or English after a thorough examination of their form and content, in three copies. The editorial board retains the right to shorten the contributions if necessary. The whole text must be written in double spacing on one side of the paper sheet with a 3 cm indent on the left side and a non aligned right side. The author must determine spaces for photographs, figures and tables and mark them textually and numerically. The text should be divided into the following sections, whenever applicable: Introduction, Material and Methods, Results, Discussion and Conclusion. The maximum allowed length of reviews and scientific papers is 10 pages including the reference list and all attachments.

The title page includes: 1. Title of paper; 2. First and last names of all authors, their academic titles and addresses of affiliations; 3. First and last name of the first listed author with address, telephone number and e-mail address.

The abstract can consist of a maximum of 200 words and must be written in English. General concepts and facts should be avoided, results should be clearly presented, and 3-5 key words listed in alphabetical order.

Tables must be handed in each on a separate sheet in a form that is adequate for reproduction, marked with Arabic numbers with the author's name on the reverse side. The maximum size of photographs is 20 x 25 cm. If a person on the photograph could be recognized, their written consent is obligatory.

The list of references can include only works named in the text published *in extenso*. The references must be listed in alphabetical order or in the order they appear in the text, and the numbers within the text must appear in brackets (e.g. 11, 15, 20). Standard abbreviations for journals must be used in the references list according to Index Medicus and the rules of the Vancouver classification. Consult Liječnički vjesnik for details.

The permission of the ethical board of the author's affiliation, of the Croatian Medical Association or of the Croatian Medical Chamber is necessary for all research works.

All papers are reviewed.
