TITLE: PaperTitle

ABSTRACT: AbstractText

KEYWORDS: KeywordList

Abstract

The abstract should be concise and should provide a clear overview of the content of the paper. Do not use acronyms and avoid citations to references in the abstract.

AUTHOR GUIDELINES

Keywords

Suggest 3-6 keywords that can be used for describing the content of your paper. Keywords should meet the following criteria:

- Keywords should be one word where possible, though two- and three-word specialist terms are acceptable where necessary.
- Keywords should not be too generalized.
- Each keyword should appear in the accompanying abstract.
- Keywords may be drawn from the paper title, as long as they appear in the text of the related abstract.

PAPER TEXT

All lines should be double-spaced in Times New Roman 12 pt font and justified. Keep formatting such as bold, underlining, manual section and page breaks, to a minimum. All pages should be numbered consecutively in the bottom right-hand corner of the page, beginning on page 1.

The preferred length of the paper depends on the topic researched, but it should be no shorter than 9,000 characters (including spaces), excluding the general information, reference list, and appendices.

The body of the paper should be arranged into appropriate headings such as Introduction (obligatory), Literature Review, Methods, Findings, Discussion, and Conclusion (obligatory). Other headings may be used as well, as dictated by the needs of the paper.

Type each heading and subheading on a separate line, left-aligned. Use a numbering or lettering system for headings and avoid excessive subdivision, as in “2.1.1.1.”; for instance. Use short headings and subheadings to make the structure of your paper clear.

REFERENCE LIST

The Reference List should conform to the editorial style of The Chicago Manual of Style. Please pay close attention when creating your Reference List, since every work referenced in the paper must be found in the Reference List and vice versa.
