

## **Instructions for Reviewers**

The review should contain the following elements:

- a) An accurate description of the manuscript, including its title, number of pages, notes and references, and the information about the submitted abstract and the list of key words;
- b) An evaluation of the scholarly contribution of the manuscript;
- c) Suggestions for improving the manuscript;
- d) Final suggestion to the Editor, including the suggestion regarding the categorization of the manuscript;
- e) Information about the reviewer.
