

Publisher: Croatian Botanical Society (www.hbod.hr)

Address: Journal of the Croatian Botanical Society, Rooseveltov trg 6, HR-10000 Zagreb, Croatia

ISSN: 1848-8102

Abbreviated title: Glas. Hrvat. bot. druš.

Publishing frequency: 2 issues annually

Editorial board

Editor in chief:

- Suzana Buzjak, Natural History Museum, Zagreb, Croatia (2022 –)

Technical editor:

- Vedran Šegota, Division of Botany, Department of Biology, Faculty of Science, University of Zagreb, Croatia (2022 –)

Graphic design and layout

- Ana Vujasić

Predecessors:

- Sandro Bogdanović, Department of Agricultural Botany, Faculty of Agriculture, University of Zagreb, Croatia (2013 – 2022)
- Toni Nikolić, Division of Botany, Department of Biology, Faculty of Science, University of Zagreb, Croatia (2013 – 2018)

Editorial board members:

- Sandro Bogdanović, Department of Agricultural Botany, Faculty of Agriculture, University of Zagreb, Croatia
- Nenad Jasprica, Institute for Marine and Coastal Research, University of Dubrovnik, Croatia
- Daniel Krstonošić, Institute of Forest Genetics, Dendrology and Botany, Faculty of Forestry and Wood Technology, University of Zagreb, Croatia
- Ivice Ljubičić, Department of Agricultural Botany, Faculty of Agriculture, University of Zagreb, Croatia
- Toni Nikolić, Division of Botany, Department of Biology, Faculty of Science, University of Zagreb, Croatia
- Ivana Rešetnik, Division of Botany, Department of Biology, Faculty of Science, University of Zagreb, Croatia
- Ivana Šola, Division of Botany, Department of Biology, Faculty of Science, University of Zagreb, Croatia
- Nina Vuković, Division of Botany, Department of Biology, Faculty of Science, University of Zagreb, Croatia
- Petar Žutinić, Division of Botany, Department of Biology, Faculty of Science, University of Zagreb, Croatia

Journal of the Croatian Botanical Society does not charge fees for publishing an article (Article processing charges – APC), nor any other fees to authors.

Copyrights of Journal of the Croatian Botanical Society

Editorial Team supports open access to all published content. Journal of the Croatian Botanical Society is an Open Access journal. Users are allowed to read, download, copy, redistribute, print, search and link to material, and alter, transform, or build upon the material, or use them for any other lawful purpose as long as they attribute the source in an appropriate manner according to the CC BY licence. This work is licensed under a Creative Commons Attribution 4.0 International License. Authors that publish in Journal of the Croatian Botanical Society retain unrestricted copyright to their work and publishing rights. Work is licensed under the CC BY licence which allows articles to be re-used and re-distributed without restriction, as long as the original work is correctly cited.

Journal topics

Vascular plants, bryophytes, lichens, algae, fungi, vegetation, habitats, taxonomy, systematics, nomenclature, ecology, applied botany

Objectives & Scope

Journal of the Croatian Botanical Society publishes:

A/ contributions in accordance with acceptable topics of the journal in the form of:

- Original scientific paper
- Short communication
- Professional paper
- Review paper

B/ contributions to the bibliography on flora and vegetation of Croatia

C/ book reviews

D/ news and other information related to the work of the Croatian Botanical Society as well as the broader botanical and biological community, and related professions and disciplines.

History

On the regular annual meeting of the Croatian Botanical Society, held in Zagreb on December 21, 2012 it was decided to launch a new botanical journal – Journal of the Croatian Botanical Society.

Journal of the Croatian Botanical Society is conceived as a journal intended for publishing scientific and professional articles about the biology of plants (including algae, lichens and fungi), in Croatian or English language, for domestic and foreign botanical community. Geographically it is primarily focused on the territory of the Republic of Croatia and adjacent areas.

The need for the publication of the Journal of the Croatian Botanical Society stems from changes that occur in the professional and scientific scene in Croatia and the world, which particularly intensely began over last decades. It becomes increasingly difficult to publish professional and scientific contributions on the flora of Croatia in international magazines or magazines with

pretensions to international publishing scene. Valuable knowledge of the national flora, especially contributions of botanists outside the system of science and higher education, therefore remains largely unpublished and inaccessible to the public.

On the other hand, the demand for data on the Croatian flora, vegetation, habitats, etc., is growing, as well as the demand for diverse scientific results in the field of phylogeny, floristics, biogeography and taxonomy of Croatian flora. Numerous professional and scientific data are needed for monitoring purposes in the environment, the implementation of protection programs, biodiversity assessment, risk of extinction assessment, planning and implementation of sustainable development with regard to biodiversity, monitoring of invasive species, knowledge on useful plants, for the monitoring of the phenomenon of endemism, impacts of biotic factors on flora and other related knowledge.

The intention of the Journal is to fill the void that was created between the growing demand and the difficulty of appropriate publishing of professional and scientific data about the flora. The intention is to ensure quick and easy publishing of smaller or larger, professional and scientific contributions in the Journal, with the dynamics adapted to the real needs of botanical community and related fields in an easily accessible electronic form. Croatian Botanical Society, as a professional association, ensures the technical and scientific quality and reliability of data.

Furthermore, the Journal serves as a means of dispersion of relevant information of the widest range to botanical and wider community in a way that has not yet been available. Such data and information include e. g. nomenclatural and taxonomic changes of the Check-list of Croatian flora, results of field observations on areas on which no data exist or those data are sparse or old, new findings of rare or threatened species, contributions to the bibliography of Croatian flora, as well as extensive professional and scientific contributions. The Journal would be a place for information and news from regular activities of the Croatian Botanical Society, information about new papers and publications, support for the implementation of symposia, workshops and conferences, popular-professional lectures, etc.
