About the journal:

Journal of Bioanthropology is a multi and interdisciplinary scientific journal that focuses on scientific research in the field of biological anthropology, bioarchaeology, biomechanics, biomedicine, ergonomics, forensics, genetics, human evolution, molecular anthropology, public health and related subjects. Official language of the Journal is English.

All articles published by the Journal of Bioanthropology are made freely and permanently accessible online immediately upon publication, without subscription charges or registration barriers.

Journal of Bioanthropology operates a double-blind peer-review system, where the reviewers do not know the names or affiliations of the authors and the reviewer reports provided to the authors are anonymous.

Submitted manuscripts will generally be reviewed by two to three experts who will be asked to evaluate whether the manuscript is scientifically sound and coherent, whether it duplicates already published work, and whether or not the manuscript is sufficiently clear for publication. Reviewers will also be asked to indicate how interesting and significant the research is. The Editors will reach a decision based on these reports and, where necessary, they will consult with members of the Editorial Board.

Articles in Journal of Bioanthropology are published under Creative Commons Attribution NonCommercial-NoDerivatives 4.0 International license.
