GUIDELINES FOR REVIEWERS

Each manuscript published in the magazine Papers of the Institute for Scientific Research Work in Varaždin undergoes a double-blind peer review evaluation process. The Editor’s Office sends a manuscript to a reviewer including a form in electronic format. After the completion of the process, the reviewer returns the filled form with electronic signature to the Editor’s Office.

The Editor’s Office kindly asks reviewers to pay attention to the quality of a manuscript, its scientific contribution and adequate categorisation including comments on any contents overlapping with other (published) manuscripts.
